EXPERIENCE

InAmigos Foundation

Nov 2025 – Dec 2025

Blog Writing Intern

Remote

- Authored SEO-optimised blogs on social impact topics, improving engagement and online visibility
- Collaborated with the content team to align articles with outreach campaigns and audience goals
- Applied research and content optimisation techniques to improve readability and search performance

PROJECTS

NewsMind.AI – AI-Powered News Intelligence Platform

[GitHub Repository](#) | [Live Demo](#)

- Built a real-time AI news analysis platform using hybrid LLM architecture with Llama and Gemini models
- Implemented forensic bias detection by analysing omission, entropy, and content density across sources
- Developed a live debate engine using Socket.io with real-time scoring based on logic and evidence
- Designed scalable backend APIs using Node.js, Express.js, and PostgreSQL

Lumina – AI-Powered Personal Wellness Dashboard

[GitHub Repository](#) | [Live Demo](#)

- Developed a comprehensive wellness platform combining affirmations, AI-guided meditation, journaling, focus timers, mood tracking, and vision boards
- Integrated Groq AI API for personalized meditation script generation and intelligent guidance with offline fallback support
- Built reusable React components with Framer Motion animations for smooth page transitions and interactive UI elements
- Implemented browser localStorage for persistent user data management across affirmations, mood history, journal entries, and vision boards
- Designed calming, spiritual UI with Playfair Display typography and glass-morphism effects for a premium wellness experience

COMMUNITY SERVICE & VOLUNTEER WORK

Volunteered as an event coordinator at college hackathons and tech events. Participated in drama, scripting, and storytelling activities. Demonstrated leadership and teamwork through organising college events.
